FRIDAY, JAN. 5, 1900

All the prosperity enjoyed by the American people-absolutely all the prosperity without any reservation whatever-from the foundation of the United States government down to the present time, has been under the reign of protective principles; and all the hard times suffered by the American people in the same period have been preceded either by a heavy reduction of duties on imports (or by a threat of such reduction) or by insufficient protection; thus refuting all free-trade theories on the subject.-New York "American Ship-

White and Marsh, who were recently fired from the state military board, skipped for parts unknown the first of the week. It is thought by the friends of Marsh that he will return to Lansing and face the scandal being unearthed by the grand jury, but there are no hopes of White returning, except he be found and brought back. Late investigations show it up as a rotten piece of business and it is hoped the jury will go to the bottom of it.

Carl Schurz is willing that free silver shall be the issue if expansion may be defeated. Mr. Schurz is generous but his suggestion is too late. The only issue left for Mr. Schurz is Aguinaldo's through which his friends may now continue to talk.

taken that Senatorial plum himself.

Literary Notes

"Admiral Dewey's Home and its Mistress" forms the subject of an interesting sketch of this much talked of residence and the wife who now rules over the home of the brave admiral, from the pen of Edith Warren Stetson in the Metropolitan for January. This popular magazine is sold by Sharrar & Mul-

holland, druggists. Dr. Watson ("Ian Maclaren") makes a a fine beginning of his "Life of the Master" in McClure's Magazine for January with chapters covering the period of youth and childhood. His method is to make full and coherent record of the outer, material facts, but at the same time to make plain all of the inner spiritual significance; and the result is a presentation interesting as pure narrative and yet of high poetic nute? If the heart is to be sturdy and devotional quality. The same aim e nerves strong this blood must appears also in Mr. C. K. Linson's picand pure. Hood's Sarsaparilla tures. Of these there are eight beautidi full page pictures in color—a feat in lor reproduction beyond anything iously attempted in magazine work; number of smaller, but scarcely sautiful, pictures in black and

Two-thirds of the world's sugar is now produced from beets. Prior to 1871-2 the world's production of beet sugar had never reached 1,000,000 tons: to latest estimates, 5,510,000 tons, whole the cane sugar crop, which in 1871 2 Page was 1,599,000 tons, is in the present year 2,904,000 tons. Thus cane sugar production has scarcely doubled during the period under consideration, while that from beets has more than quintupled. Meantime the price has fallen more than one-half, the average cost in foreign country of all sugar imported into the United States in the fiscal year 1872 beper pound. No development of the world's production of foodstaffs has been more rapid or striking than that the total beet sugar crop of the world was but 182,000 tons; by 1864 5 it had 1900, 5,512,000 tons. In 1854-5 best sugar formed 13 per cent. of the world's total sugar crop and in 1899-1900 it formed 66 per cent. Thus the sugar than a half century been shifted from of the temperate zone has shown his priced labor of the tropics, but in doing article produced. These facts are of great interest in Michigan where beet sugar production has recently been undertaken on a large scale and no doubt congress to determine the proper course which just now is of special importance

You may, however, tell any man how he may get rid of his infirmities. Most ities and is poor in quality. This condition causes weakness of some particu-
